

## Statement by the Supreme National Security Council on the U.S. acceptance of Iran's conditions

- 19 Farvardin 1405 - 02:39 - April 8, 2026

**A statement from the Supreme National Security Council regarding the US's acceptance of Iran's conditions was published.**

According to [Tasnim News Agency](#), the Supreme National Security Council issued a statement regarding the US's acceptance of Iran's conditions.

The text of this statement is as follows:

The enemy has suffered an undeniable, historic and crushing defeat in its cowardly, illegal and criminal war against the Iranian nation. Thanks to the pure and innocent blood of the martyred leader of the Islamic Revolution, His Highness the Ayatollah Imam Khamenei (peace be upon him), the measures of the Supreme Leader of the Islamic Revolution and Supreme Commander of the Armed Forces, His Highness the Ayatollah Seyyed Mujtaba

Khamenei (may God protect him), the struggle and bravery of the warriors of Islam on the fronts, and especially, the historic, lasting and epic presence of you, the dear nation, on the scene from the very first days of the war, Iran achieved a great victory and forced the criminal America to accept its 10-point plan, in which the United States is committed in principle to guaranteeing non-aggression, continuing Iranian control over the Strait of Hormuz, accepting enrichment, lifting all primary and secondary sanctions, terminating all resolutions of the Security Council and the Board of Governors, paying Iran compensation, withdrawing American combat forces from the region and stopping the war on all fronts, including against the heroic Lebanese Islamic resistance. We congratulate all the people of Iran on this victory and emphasize that until the details of this victory are finalized, there is still a need for perseverance and prudence on the part of the authorities and for maintaining the unity and solidarity of the Iranian people.

Islamic Iran, together with the brave resistance fighters in Lebanon, Iraq, Yemen and occupied Palestine, has dealt blows to the enemy in the past 40 days that the historical memory of the world will never forget. Iran and the axis of resistance, as representatives of honor and humanity against the most savage enemies of humanity, have taught them an unforgettable lesson after a historic battle and have crushed their forces, facilities, infrastructure and all their political, economic, technological and military capital to such an extent that the enemy has now fallen into decay and despair and sees no other way than surrendering to the will of the great Iranian nation and the noble axis of resistance before it. On the first day that Iran's criminal enemies began this cruel war, they thought that they would achieve complete military dominance over Iran in a short time and, by creating political and social instability, would surrender Iran. They thought that Iran's missile and drone fire would quickly die down and they did not believe that Iran could give them such a powerful response beyond its borders and across the entire region. The evil global Zionism had convinced the ignorant American president that this war would finish Iran off and that by eliminating this last bastion of humanity, they could now easily commit any crime against anyone they wanted. They dreamed of dividing dear Iran, plundering its oil and wealth, and ultimately leaving the Iranians in the midst of chaos, instability, and insecurity for many years to come.

The brave warriors of Islam and their brave allies in the axis of resistance, despite their hearts being wounded and torn to pieces by the martyrdom of their Imam, relied on God Almighty and the Lord and Master of Martyrs, and decided to teach these enemies a historical lesson once and for all, take revenge on them for all their past crimes, and create conditions in which the enemy would forever banish the idea of aggression against dear Iran and fully taste the taste of humiliation and humiliation in front of the great Iranian nation.

With this strategy and relying on the unprecedented political and social unity that had been created in the country, Iran and the resistance began one of the heaviest combined battles in history with America and the Zionist regime, and during this time they achieved all the goals they had planned for this battle. Iran and the resistance almost completely destroyed the American military machine in the region, dealt crushing and deep blows to the mass of infrastructure and facilities that the enemy had built and deployed in the region over the years for this war with Iran, inflicted massive casualties on the criminal American army on a regional scale, inflicted devastating and crushing blows on the enemy's forces, infrastructure, facilities, and assets inside the occupied territories, and narrowed the field on all fronts to the enemy to such an extent that not only were none of the enemy's main goals achieved, but the enemy realized about 10 days after the start of the war that it would not be able to win this

war in any way, and for this reason, it began trying to communicate with Iran through various channels and methods and request a ceasefire.

The noble nation of Iran should know that thanks to the struggle of its children and their historical presence on the scene, the enemy has been begging for more than a month to stop the fierce fire of Iran and the resistance, but the country's officials, because it was decided from the very beginning that the war would continue until the goals were achieved, including the enemy's regret and despair and the removal of the long-term threat to the country, responded negatively to all these requests, and the war has continued until today, which is the fortieth day. Iran has also rejected the deadlines presented by the US President several times and continues to emphasize that it does not attach any importance to any kind of deadline from the enemy.

We now give the great nation of Iran the good news that almost all the objectives of the war have been achieved and your brave sons have brought the enemy to a historic impotence and a lasting defeat. Iran's historic decision, which enjoys the unified support of the entire nation, is to continue this battle for as long as necessary until its great achievements are consolidated and new security and political equations are created in the region based on the acceptance of Iran's power and sovereignty and the resistance.

In this regard, and in accordance with the advice of the Supreme Leader of the Islamic Revolution, Ayatollah Seyyed Mojtaba Khamenei (may God protect him) and the approval of the Supreme National Security Council, and considering Iran's upper hand and resistance on the battlefield, and the enemy's inability to carry out its threats despite all claims, and the official acceptance of all the legitimate demands of the Iranian people, it was decided to hold negotiations in Islamabad to finalize the details so that within a maximum of 15 days, with the finalization of the details of Iran's victory on the battlefield, it can also be consolidated in political negotiations.

In this regard, Iran, while rejecting all the plans presented by the enemy, formulated a 10-point plan and presented it to the American side through Pakistan, emphasizing the fundamental points such as controlled passage through the Strait of Hormuz in coordination with the Iranian armed forces, which would grant Iran a unique economic and geopolitical position, the necessity of ending the war against all elements of the axis of resistance, which would mean the historic defeat of the aggression of the child-killing Israeli regime, the withdrawal of US combat forces from all bases and deployment points in the region, the establishment of a safe transit protocol in the Strait of Hormuz in a way that guarantees Iran's dominance according to the agreed protocol, full payment of Iran's damages according to estimates, the lifting of all primary and secondary sanctions and resolutions of the Board of Governors and the Security Council, the release of all of Iran's frozen assets abroad, and finally the ratification of all of these matters in a binding Security Council resolution. It should be noted that the ratification of this resolution would turn all of these agreements into binding international law and would create an important diplomatic victory for the Iranian nation.

Now, the Honorable Prime Minister of Pakistan has informed Iran that the American side, despite all the apparent threats, has accepted these principles as the basis for negotiations and has surrendered to the will of the Iranian people. Accordingly, it was decided at the highest level that Iran will hold talks with the American side in Islamabad for two weeks and solely on the basis of these principles. It is emphasized that this does not mean an end to the war and

Iran will accept an end to the war only when, in view of Iran's acceptance of the principles envisaged in the 10-point plan, its details are also finalized in the negotiations.

These negotiations will begin in Islamabad on Friday, April 11, with complete distrust of the American side, and Iran will allocate two weeks for these negotiations. This period can be extended by agreement of the parties. It is necessary to maintain complete national unity during this period and to continue the victory celebrations with strength. The current negotiations are national negotiations and a continuation of the field, and it is necessary for all people, elites, and political groups to trust and support this process, which is under the supervision of the revolutionary leaders and the highest levels of the system, and to strictly avoid any divisive statements. If the surrender of the enemy in the field becomes a decisive political achievement in the negotiations, we will celebrate this great historical victory together, otherwise we will fight side by side in the field until all the demands of the Iranian nation are achieved. Our hands are on the trigger, and as soon as the slightest mistake by the enemy is made, it will be responded to with full force.

Supreme National Security Council
